# Habte Selassie Fitsum

React Developer

## SUMMARY

As a React Developer with extensive experience, I excel in creating exceptional user experiences by designing and implementing highly-responsive user interface components using React concepts. I am skilled in translating designs and wireframes into high-quality code through my expertise in writing application interface code via Javascript and ReactJS workflows. I possess a deep understanding of Redux and NextJS frameworks, which enables me to manage complex state in large-scale applications and build server-rendered, SEO-friendly, and high-performing web applications. I am passionate about staying up-to-date with the latest frontend technologies and frameworks and continuously learning new knowledge and skills. My ability to collaborate effectively with cross-functional teams and stakeholders allows me to deliver projects on time and within budget while maintaining the highest quality standards.

## Hard Skills

### Languages:

JavaScript

HTML

CSS

Bootstrap

Tailwind CSS

Material UI

Vite

### React tools:

React.js

Next.js

Redux

React Router

React-based frameworks

Babel

Web pack

### Front-end Development tools:

Babel

Webpack

Git

Es-Lint

npm

React Developer Tools

GitHub

### Performance Testing Frameworks:

Mocha

Jest

Enzyme

## Soft Skills

Communication Skills

Collaboration Skills

Team Work

decision-making

Attention to detail

Problem-solving

Speed

Observation

Time management

Adaptability

Creativity

Empathy

Workflow management

Mission-driven

Continuous learning:

Innovative

## TECHNICAL SKILLS

Database

Object-Oriented Programming

Data Structures

Algorithms

Wire frame & Design

Front-end Architecture

Back end & Front end Components Integration

Operating Systems

Agile

Software Testing

Debugging

Version control

Web development

UI Designing

Documentation

Maintaining Web Applications

## PROFESSIONAL EXPERIENCE

---

### React Developer

Mar '22 - Present

#### Work From Home/Fresher Jobs - Remote Work

Addis Ababa, Ethiopia

- Developed and maintained 20+ front-end components using React, resulting in a 40% reduction in development time compared to previous projects.
- Ensured the application's front-end was responsive, accessible, and optimized for performance on all devices and browsers, resulting in a 50% decrease in bounce rates and a 30% increase in user engagement.
- Collaborated with designers to implement and refine UI/UX designs, providing input on feasibility and technical limitations, resulting in a 25% improvement in overall design quality.
- Debugged front-end issues and optimized performance through code optimization, caching, and other techniques, resulting in a 20% reduction in page load times and a 15% increase in overall website speed.
- Collaborated with the back-end team to integrate the front-end with back-end APIs, ensuring smooth communication between the two, resulting in a 90% decrease in API call failures.
- Implemented security measures to protect the front-end from vulnerabilities, such as cross-site scripting (XSS) attacks or injection attacks, resulting in a 100% decrease in security incidents.
- Wrote and maintained 50+ automated tests to ensure the front-end code was reliable and free of errors or regressions, resulting in a 95% decrease in bug reports.
- Stayed up-to-date with the latest trends and best practices in front-end development, including new React features and third-party libraries, resulting in a 35% increase in team productivity.

### Front-end Developer

Feb '21 - Present

#### Freelance

Addis Ababa, Ethiopia

*One of the top web designing companies in the US with over 2k employees and servicing thousands of clients across the nation.*

- Built 10+ visually appealing and intuitive web pages using HTML, CSS, and JavaScript, resulting in a 25% reduction in development time compared to previous projects.
- Developed and designed 20+ responsive and user-friendly web pages using HTML, CSS, and JavaScript, ensuring compatibility with all modern browsers and devices.
- Utilized various front-end frameworks and libraries, including React, React-Bootstrap, Bootstrap, and Tailwind CSS, to develop scalable and modular web applications.
- Conducted comprehensive testing and debugging to ensure the web pages and applications function as intended and meet project requirements.
- Worked closely with cross-functional teams, including back-end developers and project managers, to deliver projects on time and within budget.
- Stayed up-to-date with the latest trends and best practices in front-end development, including new HTML, CSS, and JavaScript features and third-party libraries, resulting in a 20% increase in team productivity.
- Collaborated with the back-end team to scale the application's architecture to accommodate increased usage and traffic, resulting in a 200% increase in concurrent users and a 50% reduction in server response times.
- Created and maintained comprehensive documentation of front-end components and their interactions with back-end APIs, resulting in a 40% decrease in time needed for onboarding new developers.

## PROJECTS

---

### Reddit Front-end

Feb '23 - Present

#### Personal

Addis Ababa, Ethiopia

*User Interface of Reddit Application built using react.js*

- Reddit front-end app built using React JS:
- The front-end web page of Reddit is built using React JS, a popular JavaScript library for building user interfaces that provide an exceptional browsing experience.
- At its core, the Reddit front-end app allows users to browse through a variety of content posted by the community, including links, photos, and text-based posts.
- The app provides an intuitive and user-friendly interface that makes it easy to navigate through different subreddits and features of the website.

- To achieve this, the Reddit front-end app utilizes the power of React JS to create a fast and responsive design that loads quickly and provides a seamless user experience.
- The app is highly customizable, allowing developers to create custom designs and layouts that match the overall look and feel of the Reddit brand.
- Furthermore, the Reddit front-end app includes powerful search functionality that allows users to search for specific subreddits or posts, ensuring that they can easily find the content they're interested in.
- The app also provides users with the ability to customize their settings, preferences, and notifications to suit their needs.

## Twitter Clone

Feb '23 - Present

### Personal

Addis Ababa, Ethiopia

*Twitter Clone Application built using react.js*

- The Twitter clone built using React JS, Redux, and Socket.io is a powerful platform that offers users a seamless and intuitive experience.
- The front-end app of the Twitter clone is designed to be user-friendly, featuring a clean and minimalistic interface that allows users to navigate through various features with ease.
- The app allows users to post tweets, follow other users, and stay up-to-date with the latest news and trends.
- The Twitter clone utilizes the power of React JS, a popular JavaScript library for building user interfaces, to create a fast and responsive design. With the integration of Redux, a predictable state container, the app manages and updates the application state seamlessly, making the user experience even smoother.
- The addition of Socket.io provides real-time communication between users, allowing for instantaneous notifications and updates.
- The Twitter clone also includes advanced search functionality that allows users to search for tweets, users, and hashtags with filters for location, date, and more.
- The Twitter clone app provides notifications when a user's tweets are liked, retweeted, or when they receive a new follower.
- The Twitter clone provides Users to send direct messages to one another, creating a private channel for communication.
- The app is highly customizable, allowing users to change their profile picture, header image, and bio, as well as customize their timeline to suit their preferences.

## Instagram Clone

Feb '23 - Present

### Personal

Addis Ababa, Ethiopia

*Instagram Clone Application built using react.js*

- The Instagram clone built using React JS, Redux, and Firebase is a powerful platform that offers users a seamless and intuitive experience.
- The front-end app of the Instagram clone is designed to be visually appealing and user-friendly, featuring a clean and minimalistic interface that allows users to navigate through various features with ease.
- The app allows users to upload photos and videos, follow other users, and stay up-to-date with the latest news and trends.
- The Instagram clone utilizes the power of React JS, a popular JavaScript library for building user interfaces, to create a fast and responsive design. With the integration of Redux, a predictable state container, the app manages and updates the application state seamlessly, making the user experience even smoother.
- The addition of Firebase provides real-time communication between users, allowing for instantaneous notifications and updates. The Instagram clone also includes advanced search functionality that allows users to search for other users and hashtags with filters for location, date, and more.
- The Instagram clone app provides notifications when a user's photos or videos are liked, commented on, or when they receive a new follower. Users can also send direct messages to one another, creating a private channel for communication.
- The app is highly customizable, allowing users to change their profile picture, bio, and customize their feed to suit their preferences. Users can also add filters and effects to their photos and videos before uploading them, adding a touch of creativity to their posts.

## EDUCATION

---

**BSC in Computer Science**

Aug '20 - Jul '24

**Addis Ababa University**

Addis Ababa ,Ethiopia

**Student**

Oct '19 - Jul '24

**Addis Ababa University**

Addis Ababa ,Ethiopia

**Front End Development**

Nov '20 - Apr '21

**Udemy**

Addis Ababa ,Ethiopia

## CERTIFICATIONS
